

Lighting: What's New?

Light Control and Sustainable Residential Design

This meeting will provide information to enable you to describe the components of sustainable design by examining current concepts of green living. You will be able to identify how the control of electric and natural light contributes to residential energy savings by examining data surrounding residential energy consumption. You will be able to integrate sustainable design clues into individual rooms, during any stage and on any budget of a project by examining the USGBC REGREEN Guidelines. Lastly, you will be able to describe how light control can enhance design and sustainability in a space while contributing to broader energy goals by examining a residential project example.

Thursday, November 12, 2009

5:30 p.m. to 8:30 p.m.

558 14th Street NW, Atlanta, GA 30318

Jacqueline Heslep joined Lutron Electronics in 2004 after receiving her Bachelor of Science in Mechanical Engineering from Georgia Tech. She has been learning about all segments of the business through Lutron's Sales Rotation program. In 2005, Jacqui worked in the Toronto market on commercial specification sales, followed by a corporate assignment as project manager for the Residential Experience Center in Coopersburg, Pennsylvania. This has exposed her to the day-to-day challenges faced by her customers. In 2006, Jacqui moved back to Atlanta to take a residential sales role, and started building relationships with AV integrators, architects, interior designers, developers, builders, contractors and remodelers.

Jacqui is currently the Southeast Sales manager at Lutron with responsibility over residential, commercial and distribution business in Alabama, Georgia, and the Panhandle of Florida.
